

PROFESSIONAL DRIVER DEVELOPMENT

World Speed Academy

A 2-Day Intensive Program Built on Progressive Mastery

The Program

Our training has always been bespoke — tailored to each driver's goals and experience level. The World Speed Academy is our answer to building champions from the ground up: a structured, progressive program that serves as the ideal bridge from karting to car racing, while also giving experienced drivers the tools to sharpen their skills and make breakthroughs.

Day 1 — Car Control

Wings removed. Street tires on. The entire day takes place on our giant skid pad — a setup that provides a fraction of the grip of racing slicks and provides genuine car feel and a repetition of exercises you can't get on track.

What you'll work on:

- Dedicated car-control exercises on the skid pad that build throughout the day
 - Develop an intuitive feel for how the car moves, slides, and responds
 - Build mechanical and mass sensitivity that accelerates the kart-to-car transition
 - Skills that give experienced drivers a deeper level of feel they'll carry to the track
-

Day 2 — On Track

We move to the circuit. Speed is built methodically — from learning the layout with a coach to full-speed lapping on slicks with wings. Every module builds to the next.

The schedule:

- Coach-guided track drives to learn the course
 - Lead-follow sessions to progressively build pace
 - Partial-speed "stop box" modules
 - Full-speed lapping on slicks with wings
-

Who It's For

Kart to Car

The Academy is purpose-built to make the transition from kart to formula car as smooth and confidence-building as possible. Day 1 on the skid pad accelerates the learning curve dramatically — giving you the feel for a faster, heavier machine before you ever approach the limit on track.

Skill Enhancement

Already racing? We run our current World Speed drivers back through the Academy to sharpen fundamentals and eliminate bad habits. There's no better investment in a racing career than returning to first principles with focused, expert coaching.
